PROFILE SUMMARY

Passionate about electronics, electricity, programming, and web development, I specialize in industrial automation and industrial computing. Curious and adaptable, I integrate the latest innovations to optimize and modernize automated systems. My goal is to provide innovative and high-value solutions, aligning your digital solutions with technological advancements to enhance business competitiveness.

PROFESSIONAL EXPERIENCE IN SPECIAL BUILDING TECHNIQUES

Engineer in special building techniques, DM GROUP   **Jun. 2017 - Jul. 2018**

- I participated in the development of architectural plans to integrate schematics of special building techniques, using AutoCAD and Revit software.

- I contributed to the "***Bois Noble of 36 Villas of ITEX AFRICA***" project by designing and implementing sanitary plumbing installations, using materials from the Valsir brand (***Italy***).

PROFESSIONAL EXPERIENCE IN WEB DEVELOPMENT

Full Stack Developer, BML BUSINESS CENTER   **Aug. 2023 - Dec. 2024**
- I worked on the front-end development of a marketplace application (customer, seller, and management sections) using Angular, integrating features with .NET Core API endpoints to ensure data communication and interactivity.
